THINK CRITICALLY

...before reacting, sharing, re-posting, or forwarding something online!

When looking at images or other information online or elsewhere, it's important to ask yourself:

1 Who posted the content?

Are they reliable?
Do they have a particular bias?

2 What are they saying?

Could the images or video be altered or taken out of context?

3 Where can I verify this information?

Are references or citations available?

4 When was the content posted?

Is it current or older?

5 Why do I think it was posted?

What is the intent of the message?

6 How do they want me to feel?

What do they want me to do?
